Charles George Ramsey, Harold Reeve Sleeper, Harold R. Sleeper, Edited by: Charles Ramsey : Architectural Graphic Standards for Architects, Engineers, Decorators, Builders and Draftsmen, 1932 Edition (A Reissue of a Design Classic) before purchasing it in order to gage whether or not it would be worth my time, and all praised Architectural Graphic Standards for Architects, Engineers, Decorators, Builders and Draftsmen, 1932 Edition (A Reissue of a Design Classic):

page, you only get pictures and charts. If you are going to buy a CD version, I would go with the 3.0 version as it is better in so many ways. I will stick to the 3.0 version and this will collect dust on the shelf.0 of 0 people found the following review helpful. Can't go wrongBy todd williamsAlready familiar w/ this book as I had the hardbound years and years back. Gave it to a house designer friend back then, and then recently found myself missing the reference to design details so this used softbound paperback is just the ticket.1 of 1 people found the following review helpful. need Windoze 7 or Vista, CAD details are via website and are not easy to download, very tedious. This is NOT a CAD libraryBy Kevin C.need Windoze 7 or Vista, CAD details are via website and are not easy to download, very tedious. This is NOT a CAD library by any means

The reissue of a design classic--the book that revolutionized the practice of architecture. When it was published in 1932, this cornerstone edition of Ramsey and Sleeper's Architectural Graphic Standards was the very first book to present the accepted architectural practices of the time in a clear and accessible graphic form. Now finally available in paperback, this landmark reference still has much to offer us today, with beautifully illustrated practical information on traditional architectural standards, methods, and materials that cannot be found elsewhere. Covering all facets of building construction from foundations to interior finishes, it will be valued by a new generation of architects, design professionals, and others involved in the restoration and renovation of historic buildings as well as anyone with an interest in architectural history.
