From Birkhuser Architecture : **Housing+** before purchasing it in order to gage whether or not it would be worth my time, and all praised Housing+:

0 of 0 people found the following review helpful. Source of Inspiration and InstructionBy Jonathan GibbWell put together informative book with great examples teamed with technical information and plans. Recommended as a great source book for inspiration.

High quality residential structures are much more than merely a series of different floor plans. First and foremost, the urban apartment house mediates between the private refuge and the public space of the city. In the process, boundaries between inside and outside are negotiated on a wide variety of scales. housing+ focuses on investigating spatial and

architectural as well as social and communicative interfaces in residential construction. More than sixty international projects are documented, with easily comparable planning material drawn specially for the volume and detailed information on every project. The book covers the entire broad spectrum of urban apartment block construction from towers, block structures, row houses, and gaps between buildings to housing complexes in outlying urban areas. Diagrams of access, building, and city planning structures enlarge upon the typological drawings. The documentation of individual example projects is supplemented by more general essays on various topics.

From the Inside Flap
Negotiating the boundary between public and private in residential buildings
About the Author
Ulrike Wietzorrek completed her architectural studies at Technische Universität München (Technical University of Munich), ETSA Barcelona, and SCI-Arc in Los Angeles, before going on to practice at firms in Munich, Mexico City, and Los Angeles. She was a research associate for six years at the Lehrstuhl für Wohnungsbau und Wohnungswirtschaft (Chair for Housing and Housing Economy) at TU München as well as an instructor with various teaching assignments. Since 2006 she has been working in Munich as an independent architect.
